

# EyeStrain Xtra 15th November

These photos are pretty self-explanatory, work continues on the loco, and to move the boiler to just outside the workshop prior to be test-fitted in the frame next week. Mike makes lots of teas and coffees, fixes the workshop electrics, takes more photographs (these ones are Richard's) and keeps the biscuit barrel full! a smaller team today, so more chips each at lunchtime! Lots done though in readiness for the Open Day at the end of November
